

City Adopts Transportation Master Plan

The City's first detailed Transportation Master Plan was adopted by the City Council on November 19. The Plan looks at meeting needs for streets, walkways, transit, and bicycle facilities through 2025. It also recommends specific improvements and funding for the next six years of transportation projects, totaling more than \$17.8 million—nearly triple the previous six-year program. The projects can be funded without new taxes.

The Master Plan helps carry out the Comprehensive Plan to increase walking and bicycling opportunities, as well as provide for motor vehicles. It identifies improvements that will be needed to address future traffic congestion and factors in the new Town Center Plan for revitalizing downtown.

Work on the Transportation Master Plan began last spring and encouraged input from interested citizens. For example, the City sent three citywide mailings and held open houses in July and September to get public input. This fall, the Planning Commission and City Council held public hearings, listened to comments, and made adjustments to the draft plan.

The adopted Transportation Master Plan has the following elements:

Roadway Plan

This presents an inventory of existing streets and their functional classifications along with recommended changes. Using a citywide analysis of current and future levels of congestion, it identifies nine future improvements needed to maintain adopted levels of service. These concurrency projects are the same ones included in the Town Center Environmental Impact Statement (EIS) and the Transportation Impact Fee ordi-

nance. This element also describes five potential roadway connections in or near the City, which could be considered if warranted sometime in the future. Finally, the plan presents many options for configuring sidewalks, planting strips, and parking, bicycle and vehicle travel lanes on the streets.

Sidewalk Plan

The Plan prioritizes about sixty sidewalk improvement projects. The priorities reflect several criteria, namely: pedestrian safety, distance from schools, connectivity with community facilities and services centers, location along an arterial, connections to transit routes and facilities, coordination with other improvements, connections to other sidewalks, and public support. This element also provides an inventory of sidewalk ramps, and strategies to install and upgrade ramps to meet Americans with Disabilities Act (ADA) design standards. Sidewalk projects will be carried out over time, with highest priorities first.

Bicycle Plan

This element presents an inventory of existing bicycle facilities and recommends numerous changes and additions to the current bicycle routes. It identifies where bike lanes would be desirable and options for configuring streets to accommodate them.

Traffic Calming Plan

Early this year, the City Council adopted a Traffic Calming program to address speeding and cut-through

traffic on neighborhood streets. This plan presents an overview of the purpose and intent of the program, and how traffic calming strategies work and need to coordinate with moving traffic along higher volume arterial streets. For information on starting a neighborhood traffic calming program, click the engineering services page under city services on the City's website at www.cityofmlt.com or call (425) 744-6275.

Transit and Transportation Demand Management

This element provides an inventory of existing services provided by Community Transit and King County METRO, including local and commuter bus routes, vanpools, ride-matching for car-

City Pride Survey Update

Code Enforcement has surveyed 8 of the 20 sections of the city located east of 52nd Avenue West to the city limits. The survey resulted in 206 cases including 23 primarily debris violations, one graffiti violation, and four vegetation issues. The remainder of the cases are for inoperable vehicles or vehicles parked on grass. As of the end of October, 101 cases, or about

49%, were closed through voluntary compliance. Areas just west of 52nd Avenue West to 60th Avenue West are the next sections that will be surveyed.

For more information about code enforcement or to report a violation, visit the City's website at <http://www.cityofmlt.com/> or call (425) 744-6254.

Plan Ahead for an Emergency

By Councilmember Angela Amundson

Hi, once again, I'm signing on to talk to you about..."Emergency Preparedness". I want to help you get yourself ready to take care of yourself for three days. If it's a wide-spread disaster, it may take three days for the City to get outside help.

1. Make a Plan
2. Build a Kit
3. Get Involved

Make a Plan

These steps will help you if a disaster hits:

1. **Take care of your loved ones** before you do anything else (including your pets).
2. **Protect your head, feet and hands.** Be alert to debris and broken glass. Wear a helmet, sturdy shoes and heavy gloves.
3. **Turn off the gas** to prevent fires.
4. **Turn off the water at the "main."** It's not just to keep outside polluted water out, it's also to keep water in.
5. **Put an OK or HELP sign in a window** to notify your neighbors and emergency workers about your situation.
6. **Go to the neighborhood gathering site and form teams.**

Team 1 - Stay put and listen to the Emergency Alert System on a portable radio.

Team 2 - Check on the elderly, disabled and small children in the neighborhood.

Team 3 - Shut off gas meters and propane tanks.

Team 4 - Go to the houses with

"HELP" signs or no sign at all and be prepared to give first aid.

7. **All teams report back** to the neighborhood gathering site when the work is done.

Build a Kit

This is what you will need, at a minimum.

1. Three days worth of food.
2. Three gallons of water per family member.
3. Battery operated radio, flashlights and batteries.
4. Blankets, extra clothes and sturdy shoes.
5. Ibuprofen, thermometer and alcohol-based hand wash.
6. Special need items such as medications, extra eyeglasses and pet food.

Get Involved

1. **Get trained** - learn CPR and first aid, learn basic health sanitation or take CERT training (Community Emergency Response Teams - see article on page 6).
2. **Talk to your neighbors** - develop a neighborhood map with contact names and numbers. Are they elderly, disabled, or are there small children? Who has special skills or equipment? Don't forget to plan your neighborhood gathering site.
3. **Get active** - Volunteer for your Neighborhood Watch Program, Crime Watch, or for the Fire District.

If you want more information, click on the City Services and Emergency Preparedness links on the city website at www.cityofmlt.com.

A Year of Accomplishment

By Mayor Jerry Smith

Another year has gone by and it has been a memorable one for Mountlake Terrace. This year has seen the City face the future with optimism and great expectations.

The City Council adopted a strategy and vision to revitalize our downtown, which over the coming years will assist us in developing a downtown that is vibrant and attractive. This strategy, a collaborative and communitywide effort, represents planning and public involvement dating back years.

We also continue to move forward with an aggressive capital improvement plan that focuses on improving our infrastructure, particularly City streets, sidewalks, parks, open space, facilities, and water, sewer and storm water utilities.

The City's finances are balanced and residents can look to the City with confidence to provide the infrastructure and the ever-increasing range of services desired by citizens.

These strategies will encourage a viable economy and improved quality of life by allowing both public and private investment that is sustainable and protects our environment. The outcome will be a vital and attractive Mountlake Terrace, not only for current generations, but also for future generations.

Mountlake Terrace has been recognized and honored in several key areas this past year, including a national award for our Recreation Pavilion, a budget award recognizing the highest principles of governmental budgeting, and a Citizen Involvement Award to recognize the City's Town Center planning process.

Our City continues to be recognized for its strong public safety programs and overall safe community. Earlier this year, 28 members of the community graduated from the City's first Citizen's Academy held since 2000. The academy, which was reinstated by the City Council in 2007, is designed to educate our residents about our public safety programs.

The City also sponsored its first July 4th fireworks show in over 20 years, attracting approximately 2,000 attendees at Evergreen Playfield, a fantastic turnout on a beautiful evening.

These awards and events are reflective of what makes our community special. We have great pride and we display an outstanding "can do" attitude that is prevalent at all levels of our community.

I'm proud of everything our City has achieved and I look forward to another year of accomplishments. You have our best wishes for a safe and peaceful holiday season. Let's make the most of this opportunity to relax and share our joy with family and friends.

Grant Funds Available in 2008

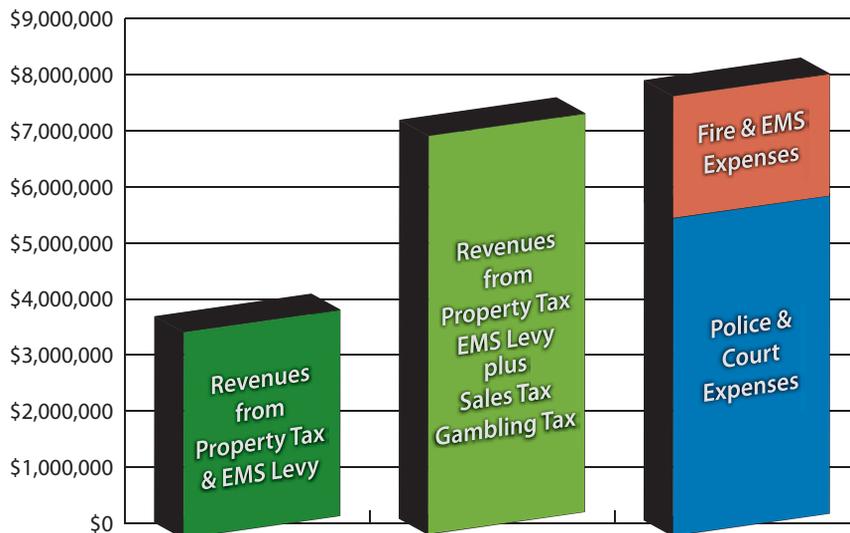

The City of Mountlake Terrace is accepting applications for \$12,500 in grant funding from non-profit organizations to help finance programs or events that benefit the community. Qualified applicants should complete and submit an application explaining their program or

event, a need for financing, and detailed budget information. A City Council subcommittee reviews the applications and supporting documentation based upon established criteria and a scoring system.

> Continued on page 5

2008 Budget Review

Major Tax Revenues vs. Public Safety Costs

The City's strong financial shape helped the Council approve a number of new programs for 2008 to better address their goals that were adopted in 2006. These goals include improving community relations, promoting economic development, pursuing capital improvements, and providing community services in a cost effective way.

Here's a list of what the Council has implemented:

Part-time position for community relations to help with a number of new community outreach programs (e.g. newsletters, website improvements, etc.).

Off-Leash Dog Park funds to cover the cost of annual maintenance after the Council approved funds to develop the park earlier this year in partnership with a group of volunteers.

Federal lobbyist to help pursue federal and state funding of various projects. The effort met with success this year when the House of Representatives approved a \$500,000 grant for improvements to the City's water utility.

Additional funding for the Street Overlay Program to offset the rising cost of construction materials over the past 12 months.

Emergency Generator to provide back-up power to City Hall and Library in the event of an emergency. This generator would replace the current 45 year-old generator.

Steiner Mower to tackle some of our toughest maintenance jobs in a more ef-

ficient way. The mower would reduce the time spent with current vegetation control (lawn mowers, weed eaters and hand tools) by 75 percent in some areas, including the Interurban Trail, water retention ponds, right-of-ways, trails and park areas.

Park & Open Space Program sets aside \$1.7 million over the next six years to purchase and develop future parks in the community.

The Council also took action in November to adopt a one percent increase to the property tax levy - an increase of about \$12 per year for an average Mountlake Terrace home.

You might be asking why the Council would increase the property tax levy if our financial forecast already shows finances are sound. The reason is that the financial forecast calls for a one percent levy increase each year so that we keep up with inflation, which has been averaging about three percent in recent years.

For example, the graph above shows that property taxes, together with sales tax and gambling tax, are still not enough to cover our most basic services of police and fire protection. If the levy was not increased regularly, we would fall farther and farther behind in covering these most basic expenses.

You can view a copy of the City's budget at City Hall or online at <http://www.cityofmlt.com>.

Construction Beginning on Park & Ride Expansion “Mountlake Terrace Transit Center”

The Community Transit Board of Directors recently awarded a \$15.3 million contract to build a four-story, five level parking garage on the site of the current Mountlake Terrace Park & Ride. The parking garage, which will hold about 660 cars, will be constructed on the lower portion of the current park & ride, adjacent to Interstate 5. The existing upper parking lot will also be renovated and will hold about 230 cars for a total of about 890 parking spaces. This expansion will more than double the current parking capacity of about 390 cars. When the facility reopens, it will be named the “Mountlake Terrace Transit Center”.

All bus routes serving the park & ride will continue to operate, except they will use the stops along 236th Street SW just outside the park & ride. CT is also building an interim stop for routes 408, 414, 477, 810, 851 and 871 on the west side of 56th between 232nd and 234th. This stop will include bus shelters, bike lockers and bike racks.

In addition to the parking garage, the facility will include large shelter areas, a glass elevator, landscaping and many security features. The project is scheduled to be complete in Spring of 2009.

When complete, the Mountlake Terrace Transit Center will not only fulfill a long

To facilitate construction, the Mountlake Terrace Park & Ride will close December 15. Community Transit (CT) has made arrangements with downtown property owners and the City of Mountlake Terrace for about 390 interim parking spaces between the blocks of 53rd and 58th Avenues W and 228th and 236th Streets SW. This parking is available to the public now. **Transit patrons using these lots should park in stalls marked with yellow striping.**

established need for more commuter parking, it is a critical link in providing improved service to transit patrons. The new transit center will be a companion transportation facility to Sound Transit’s proposed Mountlake Terrace Freeway Station. In combination, these two projects will provide access to regional express bus service along I-5 that is not yet available to area residents. The freeway station is currently scheduled to open in Fall of 2010.

In addition, \$25,000 in lodging tax funds is also available and will be allocated through a similar process led by the City’s Lodging Tax Advisory Committee. Lodging tax funds come from the hotel-motel tax and may be used only for tourism promotion or for the acquisition or operation of tourism related facilities.

These funds have helped support events such as Tour de Terrace, the Tree Lighting Ceremony, Arts of the Terrace and projects such as Garden Club planting sites and elementary school playground equipment.

Applications are available by calling Virginia Olsen, City Clerk, at (425) 744-6206 or by email to cityhall@ci.mt.wa.us. Applications may also be downloaded from the City’s website at www.cityofmlt.com on the City Happenings/News page. Application materials must be received by 5:00 p.m. on Monday, February 4, 2008.

Comprehensive Plan Amendments Being Decided

The Comprehensive Plan establishes a 20-year vision for Mountlake Terrace and is updated or amended annually, as required by the State’s Growth Management Act (GMA). The Planning Commission conducted a public hearing and held work sessions in October and November, and they have forwarded their recommendations to the City Council, with final action by the Council expected in December.

Amendment proposals are summarized here:

5603 and 5607 230th Street SW

Dr. John Catanzaro applied for a change in designation that would allow him to expand his medical practice in Mountlake Terrace and be able to incorporate residential units on his property. The parcel where the clinic is located, 5603 230th Street SW, is already zoned for downtown business and mixed use up to three stories in height. The ad-

acent property, 5607 230th Street SW, is currently zoned for single-household residential use, also up to three stories in height. Dr. Catanzaro’s application is to redesignate both properties for downtown business and mixed use up to four stories in height. The zoning change is dependent on first amending the Comprehensive Plan Map.

21220 and 21304 60th Avenue W

Kristen Schumacher and Joel Coval, property owners, applied to change the designation of two parcels. Currently, both properties are designated Urban Low Medium Residential, which allows multi-household use up to 45% lot coverage and three stories in height. The owners’ application is to change the designation to Urban Medium Residential, which allows multi-household use up to 65% lot coverage and three stories in height.

22006, 22208, 22102, 22106, 22300 56th Avenue W and 22021, 22105, 22211, 22301 58th Avenue W

This property includes the St. Pius church facility and immediately adjacent properties. It was proposed by the City Council for consideration as a possible Comprehensive Plan Map change from single-household residential to Urban Medium Residential. The change would allow multi-household units, possibly for senior housing, to be built on the property.

Text Amendments

Text amendments were proposed for minor updates to policies and action steps, mainly to reflect new state requirements for commute trip reduction and recommendations from the Transportation Master Plan.

Briefly

Emergency Training Offered for Citizens

The City of Mountlake Terrace encourages our citizens to become a part of CERT (Community Emergency Response Team) through our partnerships with the Emergency Services Coordinating Agency (ESCA) and Fire District 1.

Each agency offers CERT classes to teach citizens about readiness, basic disaster first aid, search and rescue operations, how to put out small fires and the psychological effect of disasters. Classes are free, but students need to create or purchase a home disaster kit and purchase personal safety equipment to participate in some class activities.

ESCA's CERT classes are held Thursdays from 7-10 pm. The winter class (January 10-February 28) is currently waitlisted and the spring class is tentatively scheduled for April 3-May 23. For more information about these classes, call (425) 776-3722.

Fire District 1's next CERT class will be offered in Spring of 2008. Classes meet every Monday and Thursday, 6-10 p.m. For more information, please contact Kristen Thorstenson at (425) 551-1200.

If you don't have time to take a CERT class yet, there are some other questions you should consider.

Would you be able to take care of yourself, your family, or your pet until the city could help you? If the roads were not passable and you could not go to the store, do you have supplies to last at least three days? Do you have a plan with your family and neighbors? If not, take the time to get prepared.

The next time you go shopping, pick up some extra bottled water, canned food and batteries. Don't forget about prescription medications, diapers, and personal hygiene items. Make a kit with your emergency supplies, one for home and one for the car. The city has information available at city hall to help you make a plan and prepare for an emergency. We also have helpful links and information on our website, www.cityofmlt.com by clicking on City Services and Emergency Preparedness. Check it out and get started on your emergency plan before the storms arrive. It will be well-worth the effort.

Coffee with the City

Monday, January 14, 8am

Monday, February 11, 6pm

Pavilion Jungle Room

Mountlake Terrace City Manager John Caulfield invites you to join him for coffee and casual conversation at the Recreation Pavilion, 5303 228th Street SW. Come on down and enjoy some coffee, hear what's going on in the City, provide input about City services and events, and ask questions.

Pride in our Parks

Lake Ballinger

One of Snohomish County's Best Kept Secrets

Lake Ballinger is sometimes referred to as one of Snohomish County's best-kept secrets. Nestled between the Nile Golf and Country Club and Ballinger Lake Golf Course, this resource conservancy remains as one of the most valued public facilities within the City of Mountlake Terrace. The Cities of Mountlake Terrace and Edmonds jointly own the 100-acre lake. The island, located in the middle of the lake is owned by the City of Mountlake Terrace.

Turning back the clock:

Before 1888, the lake was called Lake McAleer. Ira and Julie Bartholomew homesteaded the island. When the Bartholomews decided to retire, they sold the lake to a frequent fisherman, Judge R.A. Ballinger, one-time Seattle mayor, president of the Alaska-Yukon-Pacific Exposition and US Secretary of the interior under President William H. Taft. Judge Ballinger renamed the lake for his father, R.H. Ballinger, who was an officer in the Civil War.

During the 1930's and 1940's vacation homes were developed on the island and linked to the mainland by a one-lane causeway from the Edmonds shore. The houses have all been removed from the island and the site is preserved in its natural state. In 1967, the island was purchased by the City of Mountlake Terrace with the majority of fund-

ing coming from state and federal grants.

Current Times:

In the 1970's the City acquired property located on the east shore of Lake Ballinger on Lakeview Drive. The Ballinger Boat and Fishing Access was developed in 1976 and provides regional recreational opportunities and access to the lake. This 3-acre park is extremely popular with area residents, especially during the summer months. Visitors to the park are often greeted with sightings of bald eagles soaring above the lake, fishermen casting their lines into the water, non-motorized boats, families enjoying a picnic and children playing on the sandy beach. Park visitors also enjoy recent improvements made to the park including a newly configured picnic area with additional tables and barbecue pits, restroom building improvements, an information kiosk and a new landscape irrigation system. Repairs to the boat dock decking and railing are scheduled to take place in the near future.

Future planning efforts for Lake Ballinger and the Boat and Fishing Access will be addressed within the Recreation Parks and Open Space Master Plan that is currently being developed. For more information about the Plan, please contact Recreation and Parks Director, Don Sarcletti (425) 640-3104 or email at dsarcletti@ci.mlt.wa.us.

Winter Weather on the Way Snow and Ice Removal

We all know that winter in the Puget Sound means rain, wind and on occasion, snow and ice. When it snows or there is imminent danger of ice on city streets, the Public Works Department utilizes three trucks equipped with plows and sanding bodies and one truck equipped with anti-icing/deicing equipment to quickly clear primary and secondary routes. Once these streets have been cleared, our crews begin plowing the remaining side streets. (See map)

The anti-icing/deicing truck, acquired in 2006, allows the Public Works Department to pre-treat

bridges, primary routes, hills and other problem spots reducing icy conditions and aiding removal of snow. Anti-icing chemicals lower the freezing point on the treated road surface delaying the formation of ice and help melt snow as it hits the pavement.

When there is significant snowfall or prolonged conditions, the Public Works Department is prepared to staff for snow removal and anti-icing/deicing in three shifts around the clock.

During a storm event residents can help

- Move vehicles from streets until snow removal is complete to help crews plow better

- Locate alternate parking if you live on a steep hill
- Stay off roads unless absolutely necessary
- Give yourself plenty of time to get to your destination
- Allow plenty of room between you and the vehicle ahead

When you encounter trucks engaged in snow or ice removal:

- Yield the right of way if you can do so safely
- Keep back at least 50 feet
- Do not attempt to pass

Garbage Pick Up Info

We would also like to remind citizens about Waste Management's policy for garbage and recycling pick up in the event of a disruption in service, such as inclement weather. If Waste Management is unable to pick up your garbage, please remove the containers from the curb until the following week's regularly scheduled service. At that time, Waste Management will

pick up your previous week's garbage in addition to your current week's garbage. If you need additional containers, please use large garbage bags and place them along side your other receptacles. For more information about utilities, please call City Hall at (425) 776-1161 or call Public Works for street related issues at (425) 670-8264.

Don't Be a Holiday Crime Victim

For a crime to occur, there needs to be desire, ability and opportunity. Take any of the three away and the crime is thwarted.

We need to do our part to prevent theft by not providing opportunities for crime, especially during the holiday season. To prevent becoming a victim this season, or any season:

- Always lock your vehicle
- Don't leave valuables in your car, including credit cards, checkbooks, jewelry, bank/ATM receipts, cell phones, wallets/purses, keys, mail, vehicle title, garage door openers, CDs and portable CD players
- Install a vehicle alarm system
- Park in well-lit locations
- Take only what you need, use a bag or wallet that is easy to carry and monitor
- Shop with a friend, even if you shop separately and meet up later
- Buy small items first, and large packages last. It will be less likely you will need to leave purchases in your car
- If you do need to put packages in your car, preferably the trunk and move to a new parking spot before continuing to shop. It may be hard to part with your prime parking space, but someone could be waiting for you to walk away
- Be aware of your surroundings when you are in the parking lot, especially if it gets dark. If you are not comfortable going into the parking lot alone, ask security to escort you
- Be wary of people who approach you asking for any kind of monetary assistance. There are resources for people who are truly in need. The more emotional the story, the more likely you are being set up
- Do not underestimate the importance of reporting suspicious people and activity immediately to police using 911

Sign Up Now for New Police Citizens Academy

The Mountlake Terrace Police Department will again offer citizens the opportunity to participate in its Police Citizens Academy in early spring of 2008. Citizens learn and discuss law enforcement issues through a combination of classroom lectures and hands-on activities.

The Academy is a great opportunity for the community to come together with the Police to gain a better understanding how the Police Department delivers services to the city.

Taught by experienced public safety professionals, the Academy covers a wide range of topics and techniques used by a modern day Police Department including criminal law and procedures, police patrol and investigations, use of force, traffic accident investigation, domestic violence and many other interesting topics. This year's course has been expanded to eleven weeks. Snohomish County Fire District 1 will also provide some of the next year's instruction to address fire safety and fire fighting issues.

Citizens who participate in the Academy can ride along with a police officer, tour the police station, the 911-call center, and the jail facility. To attend the Police Citizens Academy,

you must first submit to a basic background and criminal history check.

For more information about the upcoming Police Citizens Academy or to have an application mailed to you, please contact Assistant Chief Mark Connor or Community Police Services Supervisor Joie Worthen at (425) 670-8260. Application forms will also be available at the Police Department and on the city's website at www.cityofmlt.com on the City services/Police Department page.
