who recently resigned after serving since 2002! Miriam was the first representative for Forest Crest Park.

Interviews will be scheduled in the coming weeks with the City Council Subcommittee to find a replacement for the now-vacant RPAC position created when Commissioner Woodard was selected to serve on the City Council.

- **Enterprise Content Management (ECM):** About two dozen staff continued with week two of training on the new Laserfiche ECM system. This week staff learned how to set up retention schedules, apply retention in the ECM system, and set up workflow processes. Over the next three weeks, training sessions will continue to focus on other applications of the software.
- **Website Redesign:** The new design concept was revealed at the recent City Council retreat and received a favorable response. The new blue, green, gray and white color scheme compliments the colors used in the city newsletter. Starting next week the content on the current website will be migrated to a new site and will be finished in early April. The anticipated launch date is in late April to give departments time to make any final updates, test links and modules, and ensure it is ready for public use.

## **PUBLIC WORKS (ENGINEERING & OPERATIONS) UPDATES**

- **Street Sweeping to Remove Sand:** Public Works crews are currently sweeping all of the priority routes/mains which received the majority of the sand during the recent snowstorm. After that, crews will start sweeping other areas of the city. It could take approximately 4 to 6 weeks to make a complete circuit throughout the city.
- **Main Street Construction Begins Next Week:** On Thursday, February 28, 2019 the city issued a "Notice to Proceed" to Interwest Construction, Inc. (ICI) to begin Main Street Revitalization Phase 1 construction.

Phase 1 of the Main Street Revitalization Project reconstructs the deteriorating pavement along 236th Street SW from I-5 to 56th Avenue W. Once completed, the roadway will provide one travel lane in each direction, a two-way center turn lane, and bike lanes. The improvements also include wider sidewalks with trees, decorative LED pedestrian and street lighting consistent with Town Center standards, and relocating existing overhead utilities underground. The project also upgrades the 236th/56th Avenue traffic signal, installs a new signal at Gateway Boulevard, as well as underground facilities for the future traffic signal at the intersection of 236th Street and 58th Avenue.

ICI expects to begin onsite activities as early as Monday, March 4. Initial activity is anticipated to occur along the north side of 236th Street SW between I-5 and 58th Avenue. Additionally, ICI will stage construction materials at the Civic Campus site, 23204 58th Avenue W., until City Hall construction begins later this year.

ICI will also upgrade sewer facilities in the next few weeks along 56th Avenue at and near 236th Street to accommodate future Town Center development. This sewer work will minimize potential later impacts to the new 236th Street pavement. Construction work will expand later along the remainder of the 236th Street corridor.

Construction of Phase 1 is expected to continue throughout 2019 and into early 2020. Both directions of 236th Street will typically remain open throughout construction but full closures of the roadway (with local access coordinated with each property) will occur at various times.

Bus stops along 236<sup>th</sup> Street SW will be affected during construction and Community Transit and King County Metro Transit will provide any necessary service alerts. Stay up to date throughout the project by visiting the Main Street project website ([www.cityofmlt.com/263](http://www.cityofmlt.com/263)), the Construction Updates & Projects website for weekly traffic impacts of this and other construction projects ([www.cityofmlt.com/208](http://www.cityofmlt.com/208)), or following the city's social media sites.
