

2009 Community Survey

City of Mountlake Terrace
National Research Center

International City/County Management Association

Purpose of a Community Survey

- The purpose of a community survey is to identify what we're doing well and where we can improve.
- In the short-term, this information can be used for
 - planning
 - resource allocation
 - performance measurement
 - program/policy evaluation
- In the long-term, this information helps us
 - improve in our services
 - encourage civic engagement
 - pursue better quality of life for the community
 - develop stronger community trust

National Research Center

- The survey was conducted by the National Research Center (NRC) as part of the “National Citizen Survey” program.
- Using NRC offers two advantages:
 - Consistency with our 2007 survey
 - The ability to compare our results with those of 500 other jurisdictions surveyed by NRC

The Survey Process

- Surveys were mailed to 1,200 Mountlake Terrace residences
- NRC received 323 responses
 - This is response rate of 28 percent, which is higher than the 23 percent response rate in 2007
- The results provide a confident level of plus-or-minus five percent

Survey Results

- The results of the survey are overwhelmingly positive:
 - The results show that programs and services in Mountlake Terrace are above the national norm in many areas, and that we've improved in many areas since 2007
 - The results also show that the Council's adopted goals are in line with what the community values.
