

- **Task 1—Data gathering and analysis**
  - What do we know about how water moves in the watershed and the quality of the water in the watershed?
  - What else do we need to know about the watershed?
- **Task 2—Planning & preliminary engineering**
  - Develop and compare flow reduction concepts.
  - Consider structural and non-structural and short and long-term concepts.
- **Task 3—Develop draft strategic action plan**
